## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments filed on June 20, 2007 have been fully considered but they are not persuasive.

Regarding to claims 2 and 14, Applicants argue that each of the independent claims 2 and 14, including the newly added claim 22, includes a step or means of negotiating, with a DSL modem, a value or criteria for a first performance parameter to overcome the rejection under 35 102(b) as being anticipated by Goldstein. The examiner respectfully disagrees, Goldstein discloses modem1 and modem 2 in Figure 1 wherein each modem comprises a transmitter section 34a or 34b and a receiver section 38a or 38b for negotiating, for example, a desired power level or a corrective signal between the transmitter section 34a or 34b and the receiver section 38a or 38b. See column 2, lines 46-56 and column 5, lines 44-64.

Regarding claims 5, 7, 16 and 18, Applicants argue that Goldstein fails to disclose, teach, or suggest the second performance parameter is transmit data rate. The examiner respectfully disagrees since a data rate is based on signal power/noise power as defined in equation 2, on page 6, paragraph [0029] of the instant application. Further, data rates or error rates are used and stored in the memory 32a or 32b and the microprocessor 30a or 30b conducts mathematical and logical operations in order for the receiving modem to adjust the transmitting power of the transmitting modem.

Art Unit: 2611

Regarding claim 9, wherein the error rates are at different power levels. See column 3, lines 9-24 and column 9, lines 28-58.

2. Applicant's arguments, see page 9, filed on June 20, 2007, with respect to 35 U.S.C. 112, first paragraph have been fully considered and are persuasive. The rejection of claims 2-13 has been withdrawn.

3. Applicant's arguments, see pages 14 and 17, filed on June 20, 2007, with respect to 35 U.S.C. 102(b) have been fully considered and are persuasive. The rejection of claims 12 and 21 has been withdrawn.

#### ***Claim Objections***

4. Claims 18-19, 21 and 27 are objected to because of the following informalities:

In line 1 of both claims 18 and 19, "claim 17" should be "claim 14" since claim 17 has been cancelled.

In claim 21, line 3, "the DSL modem" should be "the transmitting DSL modem".

In claim 27, line 1, "claim 25" should be "claim 26" because claim 27 is a method claim but claim 25 is an apparatus claim.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2611

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 2-11, 13-16, 18-20 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldstein U.S. Patent No. 5,265,151.

Regarding claims 2, 14 and 22, Goldstein discloses a modem 1 and a modem 2 in Fig. 1, wherein each modem comprises a transmitting modem 34a or 34b for transmitting a transmission power (first parameter) to a receiving modem 38a or 38b for receiving the transmission power, determining a signal/noise ration for the received transmission power, and requesting adjustment of the transmission power (second parameter) from the microprocessor 30a or 30b stored from the memory 32a or 32b if the transmission power is below or above a predetermined transmission power level in order to increase or decrease the transmission power. See the abstract, col. 2, lines 18-31, col. 5, line 29 to col. 7, line 10, col. 7, lines 45-56, and col. 8, line 46 to col. 9, line 58.

Regarding dependent claims 3-11, 13, 15-16 and 18-20, the transmission power includes transmission power level and the signal/noise ration is the transmission data rate. All the claimed subject matter of claims 3-13 and 15-21 are described in the abstract, col. 2, lines 18-31, col. 5, line 29 to col. 7, line 10, col. 7, lines 45-56, and col. 8, line 46 to col. 9, line 58.

***Allowable Subject Matter***

7. Claims 12, 21 and 23-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claim 27 would be allowable if rewritten or amended to overcome the objection set forth in this Office action.

***Conclusion***

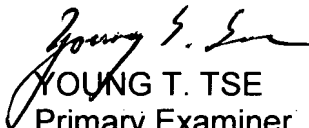

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
